BRANDT® 8625

Currency Counter

High performance desktop currency counter

BRANDT® 8625

Currency Counter

The De La Rue high speed **8625** desktop currency counter enables fast, accurate and efficient counting of currency of all conditions. Notes from new to very poor quality are processed with ease.

Fast, Efficient and Reliable

Cash processing time is reduced through three user-selectable speeds of up to 1,500 notes per minute. To meet individual customer needs, the flexibility of the **8625** enables users to easily select fixed and variable batch settings using the batch preset key or via the numeric keypad. Throughput is enhanced as the machine automatically restarts when a complete batch of notes is removed.

Easy to Use

With the dual LED display clearly showing both the count total and batch size, the **8625** is very user friendly. By pressing the 'ADD' key, the cumulative total of a count can be shown on the main display while the batch total remains on the second display. Most functions can be easily accessed with one key.

Intelligent

Utilizing the standard RS232 serial port, the **8625** can interface to a PC for efficient deposit reconciliation. With a second port for an optional remote display, the **8625** is well equipped to meet the requirements of the latest cash processing environments. The machine incorporates a power-saving function, reverting to standby mode if the machine is not used for approximately four minutes.

The optional magnetic and ultraviolet counterfeit detection aides ensure that virtually all suspected counterfeit notes are detected.

De La Rue Cash Systems coin and currency processing products are the direct result of 100 years experience in the design, manufacturing and distribution of world class cash handling solutions. Worldwide service and support is provided through De La Rue Cash Systems' network of branch offices and authorized distributors.
