

M-360 EXCEPTION ITEM ENCODER SERIES

- **Extremely Small Footprint** - The actual size of the MICR III is about the size of this page.
- **Easy to Use** - With a 2-line display, the operator is prompted through every transaction.
- **Accurate Encoding** - High quality encoding will maximize productivity of your proof department.
- **Down-sized Ribbon Cartridge** - Eliminates waste! Small, compact ribbon cartridge designed for exception item volumes.

MICR III ENCODER

Encoding exception items at the branch level accomplishes two goals:

- provides customer service in the form of starter kits, lobby deposits and counter checks.
- saves valuable time and money by presenting qualified items to the proof department.

With minimal space and training requirements, the economically priced Maverick MICR III encoder offers the optimal solution for exception item encoding.

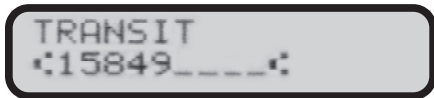

MAVERICK International

New Technology Makes MICR III Easier to Use

MINIMAL TRAINING

The Maverick MICR III is designed to accommodate the 2 primary modes of operation found in exception item encoders today. This approach allows an operator to select a function key and then enter the data

-or-

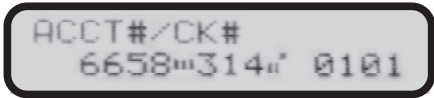

allows an operator to enter the data then press the function key.

Either mode of data entry is accepted by the MICR III.

DISPLAY

The 2-line display helps minimize errors by prompting the operator. The first line allows for descriptions and/or instructions and the second line displays the operator's entry.

These features help ensure data accuracy, thus making the MICR III extremely easy to learn and use.
