## Worldwide Presence

Nautilus Hyosung is both the number one ATM provider in the South Korean financial services market and the biggest ISO in the ATM VAN service market. Nautilus Hyosung has also achieved significant market share in the U.S. market for retail location ATMs and has now strategically focused their efforts on the U.S. banking industry.

With quality products, a vertically-integrated manufacturing approach, customer-centric philosophy and world-class software integration, Nautilus Hyosung will continue to deploy their advanced financial services solutions in Asia, Europe and South America to further fortify their position as an global industry leader.

# Business Offerings

The foundation of our success in the self-service financial solution market remains innovative, reliable hardware manufacturing and the advanced development and integration of key operational and support software. But, our Total Financial Solutions Provider

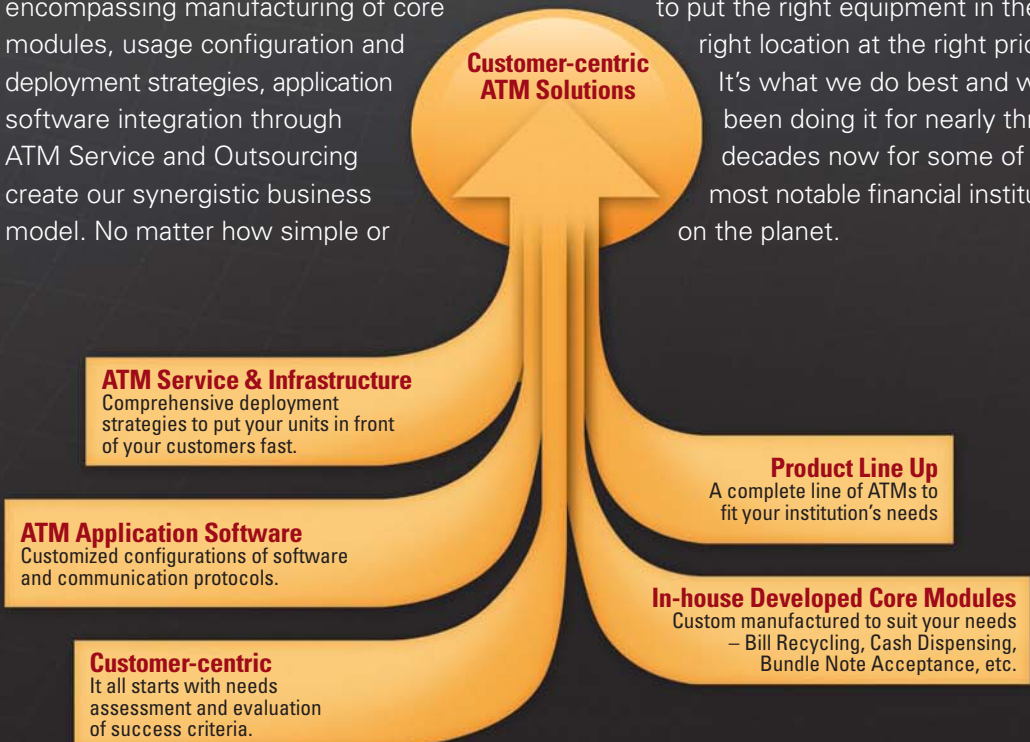

pledge is also fortified by decades of experience in delivering hallmark quality business support services – a dedicated approach which envelops all we do here at Nautilus Hyosung with a silver lining of quality and value.

# Vertical Integration

Our customer-centric approach and vertical integration technologies are key distinctions for Nautilus Hyosung. The development path encompassing manufacturing of core modules, usage configuration and deployment strategies, application software integration through ATM Service and Outsourcing create our synergistic business model. No matter how simple or

sophisticated your application – Nautilus Hyosung is uniquely capable of delivering and custom configuring a complete solution to put the right equipment in the right location at the right price. It's what we do best and we've been doing it for nearly three decades now for some of the most notable financial institutions on the planet.

# ATM Product Line

Nautilus Hyosung is pleased to present our comprehensive ATM product line. High performance standard features, a multitude of application types, and pre-engineered expandable functionality positions our ATMs among the most versatile, efficient and cost effective solutions on the planet.

All Nautilus Hyosung ATM solutions benefit from our vertical integration development model and customer-centric philosophy to deliver the pinnacle of performance, reliability and value. From needs assessment to deployment, our solutions reflect nearly three decades of research and development and rigorous in-field testing. The net result is an unmatched reputation for success and profitability for our clients.

Our ATMs feature the latest technology, including bundle check deposit and bundle note deposit functionality as either an integrated solution or as an add-on.

**Nautilus Hyosung delivers unrivaled overall value with low deployment costs and impressive flexibility.**
