

CPOE

Certified pre-owned equipment program

Cash dispensing

The optimization of cash management calls for specialist experience, resources and truly innovative technology. Across the world, Talaris' cash management solutions are trusted by thousands of organizations to ensure their cash is managed securely and efficiently while delivering the ultimate in productivity.

With Talaris' certified pre-owned equipment (CPOE) program, you get the benefits of cash automation at a lower cost than buying new. Each Talaris CPOE teller cash dispenser has been rigorously inspected and maintained, guaranteeing its quality and reliability. A six-month warranty on parts and labor is also included.

Enhance customer experience

Providing outstanding customer service is no small accomplishment — especially if your staff devotes most of their customer interaction time to counting cash. Talaris cash automation can help shift your staff's focus from cash counting to better serving customer needs. Whether you want to provide a more personal customer experience or simply want your lines to move faster, Talaris can help.

Reduce operating costs and increase productivity

Talaris cash automation equipment take the time and cost out of handling cash. By managing your cash more efficiently, you can reduce

overtime hours, while increased productivity will allow you to provide service to more customers without expanding your staff. In addition, shifting staff focus from counting and balancing to revenue-generating activities can help reduce employee stress and turnover.

Bolster security and make your location more customer friendly

Each Talaris CPOE cash dispenser can provide vault-level security for your cash — minimizing cash exposure and theft risk. With cash safely secured, your location is free from traditional security measures, such as bullet-proof glass, and you are able to open up your branch or store design to make it more customer friendly.

Vault-buy automation

Talaris' CPOE cash dispensers can be configured to only perform vault-buy transactions. This can help provide easier and quicker access to additional cash when your staff needs it. Automating the vault-buy process also eliminates the need for dual custody of cash.
